## Acne Management

### TREATMENT RECOMMENDATIONS

✦ CLEANSE

☞ HYDRATE

🔗 REPAIR

💧 MOISTURISE

🛡️ PROTECT

### **ACNE GRADE 1:**

If your skin shows signs of occasional breakouts, congestion, pimples and a combination of open and closed comedones (small bumps), then you're experiencing stage 1 acne. This can affect all skin types.

### **TREATMENT: PUMPKIN RESURFACER**

Fight back with this advanced resurfacing treatment that combines the power of AHAs, BHAs and Pumpkin Pulp to leave your skin exfoliated, decongested and feeling smooth.

### **ACNE GRADE 2:**

If you suffer with constant breakouts which can occur across the whole face, and have generally angry skin, you need to choose a specific acne treatment to improve your skin's health and appearance.

### **TREATMENT: SALICYLIC ACID RESURFACER**

This powerful treatment works to reduce the inflammation and redness caused by acne while its antibacterial properties help to prevent breakouts.

### **ACNE GRADE 3:**

If you're suffering from constant, severe breakouts across your face and neck including blocked pores, papules, pustules as well as redness and possible mild swelling then you are experiencing stage 3 cystic acne.

### **TREATMENT: MODIFIED JESSNER'S PEEL**

This advanced chemical peel is the ideal treatment for stubborn acne. It works to kill bacteria, reduce excess oil and helps to hydrate and repair the skin whilst improving its texture.

Please refer to your skin therapist where an in-depth consultation will be carried out to devise a program of treatments to achieve your skin goals
