

# DERMAQUEST

## Pigmentation

TREATMENT RECOMMENDATIONS

✦ CLEANSE

≡ HYDRATE

⦿ REPAIR

💧 MOISTURISE

🛡️ PROTECT

**PIGMENTATION  
LEVEL 1: SUN  
DAMAGE**

If you've experienced any sun damage to the skin, caused by UV radiation from the sun, it can lead to dark spots and patches of hyperpigmentation, as well as other signs of ageing.

**TREATMENT:  
MANGOBRITE  
RESURFACER**

This hydrating treatment exfoliates the skin with Vitamin C, Plant Stem Cells, Mango Fruit Pulp and Lactic Acid, working on the deeper layers of the skin to repair and strengthen cells.

**PIGMENTATION  
LEVEL 2:  
HORMONAL**

Do you suffer from hyperpigmentation caused by hormonal factors? Certain hormonal activity can stimulate the pigment causing your cells to over produce pigment in the skin.

**TREATMENT:  
HIBISCUS FLOWER  
MANDELIC PEEL**

Working to increase cellular turnover, this clever treatment brightens areas of pigmentation while smoothing, lifting and firming the skin leaving it strengthened and glowing.

**PIGMENTATION  
LEVEL 3: DEEP  
SEATED STUBBORN  
HYPERPIGMENTATION**

Are you experiencing dark, stubborn, easily visible areas of hyperpigmentation caused by acne scarring, sun damage and / or hormonal fluctuations?

**TREATMENT:  
SKINBRITE PEEL**

A powerful combination of Lactic, Mandelic and Phytic Acids work to brighten the skin. This is a deep chemical peel that works effectively to dramatically improve skin tone.

Please refer to your skin therapist where an in-depth consultation will be carried out to devise a program of treatments to achieve your skin goals
