PRE SENSITIVITY

If you experience frequent episodes of flushing and redness that come and go and are triggered by external factors such as food, stress, the environment and / or lifestyle, then you may be suffering from pre-sensitive skin.

TREATMENT: STEM CELL 3D MASQUE

This soothing treatment hydrates, nourishes and restores the skin. Gardenia and Alpine Rose Plant Stem Cells work to heal the skin, while Shea Butter provides intensive moisturisation.

SENSITIVE 1

If your skin has been sensitised by environmental factors such as harsh weather, sun, pollution or unsuitable skincare products you may experience skin redness or rosacea, dry or flaking skin and / or a stinging or soreness.

TREATMENT: LACTIC ACID RESURFACER

This gentle yet effective treatment hydrates, calms and soothes all the symptoms associated with sensitive skin, leaving your complexion looking and feeling healthy and restored.

SENSITIVE 2

Is your skin showing signs of irritation such as redness, rosacea, dryness, flakiness and / or stinging, caused by external factors and often accompanied by breakouts? Then you need to have a specialised sensitive skin treatment.

TREATMENT: SALICYLIC SENSITIVE RESURFACER

This calming and restorative treatment helps to improve skin health, nourishing and soothing even the most sensitive complexions whilst also reducing redness and inflammation.

Please refer to your skin therapist where an in-depth consultation will be carried out to devise a program of treatments to achieve your skin goals
